The FCC and a most hams, even a few "codeless tech's".

When a "codeless" tech "upgrades" to TECH plus 5WPM code, he simply gets a CSCE for the 5WPM. No forms get sent to the FCC. At least not when I upgraded. I was told to just save the form in case someone asked to see it.

Also, when I received my license (March of 1993) there was no indication other than TECHNICIAN with PRIMARY privileges. (Will this change for future technicians?)

So...what is to prevent a codeless tech from operating 10 meter SSB? Who would know that he did NOT upgrade?? Does anybody really care? ;-))

Well, almost correct. We send the paperwork to the FCC; it's just that
they don't send any back to you. :-)

>Also, when I received my license (March of 1993) there was no
>indication other than TECHNICIAN with PRIMARY privileges. (Will
>this change for future technicians?)

Not that I've heard. (Though there is now a "Tech plus HF" box on the
ARRL CSCE's.)

>So...what is to prevent a codeless tech from operating 10 meter
>SSB? Who would know that he did NOT upgrade?? Does anybody
>really care? ;-))

Actually, there's nothing to stop someone from operating anywhere beyond
their privileges, except hopefully their own honesty and integrity. Most
likely, no one would know. But there's always the possibility of someone
listening in who has a vendetta against codeless techs or recent licensees
in general, or anyone with a lower license class than s/he has, who could
conceivably challenge him/her on the issue and (at the very least) make life
miserable. If it turned out that the operator was, in fact, operating
beyond his/her privileges, and someone complained to the FCC, they could
decide to make an example of the violator. Whether, or to what degree,
they would do so, I don't know. Personally, I wouldn't risk it. If I
wanted HF that bad (which I did), I would just upgrade (which I did :-)).

FCC monitoring stations use a computerized database which lists license class for each issued callsign. Since they randomly check all bands, monitoring callsigns and checking against the database to see who's operating out of band, they may or may not catch you. In more cases than you'd imagine, someone who "knows" the ham operating in a prohibited segment tips off the local FCC office and they focus on catching him. It happens a lot - but - no doubt many violaters aren't caught, especially if the operation is casual and random. Those who begin to believe they can do it anytime, with impunity, usually get caught sooner or later.

Last I checked, Novices had privs for 10 m SSB.

Yes. You can't tell the caste of an amateur by the format of his call,
at least not after his paperwork clears the FCC. (Well you can if he
changes calls during the upgrade, of course, but otherwise not.)

--> Thanks.

That is correct. This way pesky 00s will know that NONNN who is
listed in their database as a Technician has upgraded when they
catch him operating on 20m.

However, once the license has arrived and NONNN/AA starts using
NONNN, the pesky 00s will call because their Buckmaster CD ROM is
now out of date!

OK, all of this suffixing got me thinking.

I have a call from 2-land but now live in 6-land.
Thus, when I work someone, I sign with WA2VXU/6.

Now, say I upgrade to General. How does one sign then?

WA2VXU/6/AG? WA2VXU/AG/6?

God, now I know why there is so much debate over CW! ;-)

Yours,
cantrell

Subject: Another Vanity Call Question
To: ham-policy@ucsd.edu

Being happy with my call, and having a new box of QSLs on the shelf, I haven't followed the vanity proposal closely, but I do have one question: Will Novices, Techs, etc be able to get 1x2 and 2x1 calls? I know they will be behind other groups in being allowed to submit their requests, but is there anything in the proposal that limits the calls a given class may request?

Yeah, and just think, they wouldn't have been nearly as happy if it hadn't been for those long weeks of anticipation. If Christmas came every week, the thrill of anticipation would be gone.

Subject: Problems with Abuse from Germans
To: ham-policy@ucsd.edu

I post this here to outline the increasing problems that NON German Hams are receiving whilst liveing in Germany. I am my self receiveing this sort of mail on a daily basis.. I am infact a British Ham from GM land. Its not the sort of mails that in 16 years of being a Ham that i like to see But since liveing in Germany for the past 4 years this is a common thing.I am not the only NON German ham that gets this sort of Abuse there are many others, But I am one that dont let this sort of Abuse get a hold.. So this user gets his abusive mail made Public.
Thanks.. GM8SAU/DC0HK

And..

Today a friend told me..you occupied the complete digi
DB0ODW...!

WHEN...do you do you promises.

Stop TCPIP in Germany....go to UK...and...and...

Thats are all big speeches and nothing behind it.

I think its still better here than in your UK..isn't it!

Otherwise you would not stay here and bring all the nonsense
to amateur radio.

You know there are still regulation of amteur radio and this
regulations will stop your doing.

Please make us all happy.....keep your promises!

Well aside from any of a lengthy list of NALs he could get because of
illegal operating, the most likely cause for license revocation of a
VE would be taking a bribe to falsify an exam. That's really bad news
for you because it likely means that all applicants he passed will have
to be retested.

>2) what can I do to get my license without waiting another month??? Does
> anybody have the addresses of the Texas senators, or representatives
> for precinct 1107 in Texas?

>

>3) can the ARRL do anything to find out what is *really* going on with my
> application??? This is *mighty* frustrating!!!

Neither can help. You are well and truly screwed if the VE's license was
revoked for cheating. If his license was pulled for an operating violation,
you may still be in luck after the investigation is complete. The best
thing you can do is contact the VEC which sponsored the exam session
and have them follow through for you. I'm afraid you're going to have

to retest though since the exam proctoring has been tainted.
